LABORATORY

FACULTY OF CIVIL
ENGINEERING AND
ARCHITECTURE OSIJEK

RECOGNISED SKILLS IN CIVIL
ENGINEERING LABORATORY WORK.

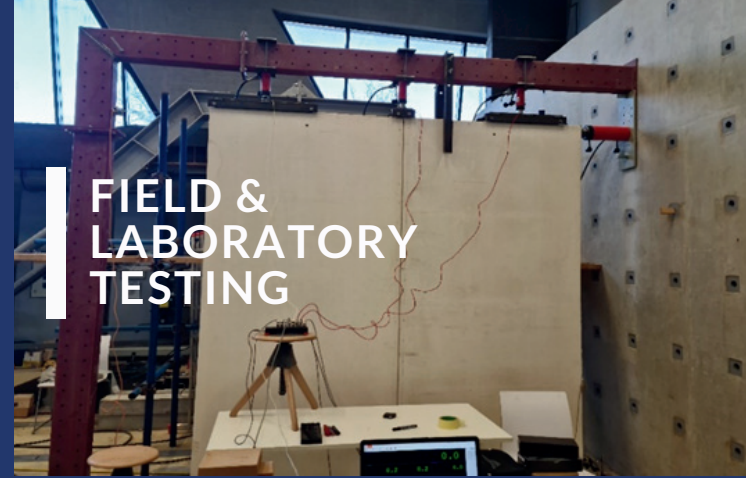

At GRAFOS, we teach our students about the real world, in order to prepare for it.

Our Mission

Within the framework of combining scientific research and professional work through active participation in scientific and technological projects and cooperation with other educational institutions, institutes and experts from the field, the Faculty of Civil Engineering and Architecture in Osijek strives to strategically equip its laboratory in accordance with its defined scientific identity.

ABOUT US

The Faculty Laboratory, with its facilities and layout, is intended to actively support the fundamental activities of the Faculty: teaching, scientific research and professional work.

FIELD & LABORATORY TESTING

OUR SERVICES INCLUDE:

- Soil testing and geotechnical surveys
- Transportation network analysis
- Road design and testing
- Material Properties Testing
- Structural Load Testing
- Non-destructive Testing (NDT) of Structures
- Project Management Techniques
- Sustainable Construction Practices
- Finite Element Analysis (FEA)
- Flood Control and Management
- Water Resource Management Studies

Tailored Civil Engineering Solutions:

Each department's services are geared towards leveraging their unique knowledge and skills, providing comprehensive and detailed solutions for various aspects of civil engineering.
